SUMMARY

I am an intuitive, analytical, and precisional front-end web developer. I was a collegiately-trained musician, and solved both technical and artistic problems through innovation, creativity, collaboration, and persistent focus. I now leverage those strengths into my passion for web development. I'm looking to grow my skills and knowledge with a company that values curiosity, integrity, and zeal.

EXPERIENCE

GENERAL ASSEMBLY

Seattle, WA

Developer in Residence

Jun 2015 to Current

Using my technical knowledge and instructional experience, I assist immersive students with learning full-stack web development. I'm responsible for helping with lesson planning and curriculum design, presenting course information sessions, holding office hours, troubleshooting project code and guiding student learning, giving constructive student feedback, and collaborating and planning with other instructors and staff.

GENERAL ASSEMBLY

Seattle, WA

Full-Stack Web Developer

Mar 2015 to Jun 2015

After finishing an undergrad degree and copious amounts of research and soul-searching, I decided to explore my constant curiosity for technology. GA was the obvious choice, so I followed my gut instinct, moved to Seattle, dedicated 60+ hours a week to learn cutting-edge skills, and I haven't looked back. In just three months' time, I became confident in my ability to effectively create, innovate, troubleshoot, and collaborate.

DANIEL P. SMITH VOICE STUDIO

Seattle, WA

Voice Instructor

Mar 2014 to Current

I instruct private voice clients using a specialized, functional vocal technique. My coaching experience includes repertoire in pop, jazz, R&B, soul, folk, and classical. I also teach complementary musicianship skills, such as foreign language diction (French, Italian, and German) for classical repertoire, sight-reading, and rhythm and ear training skills.
